- Problem-solving

LANGUAGES

- Armenian - Proficient (C2)
- English - Advanced (C1)
- Russian - Advanced (C1)

I am a QA Engineer with experience in testing web and mobile applications to ensure they work smoothly and reliably. Skilled in planning tests, running them, and improving testing processes.

I will be happy to grow in a supportive team and help create high-quality products that meet user needs.

EXPERIENCE

QA Engineer

«GOYA» CJSC | 2021 July - Present

My responsibilities are:

- Collaborate with stakeholders to analyze and clarify product requirements.
- Plan and organize testing activities aligned with project goals and timelines.
- Design and execute comprehensive test cases based on functional specifications.
- Perform functional, regression, and exploratory testing to ensure product quality.
- Identify, document, and report bugs using standardized bug tracking tools.
- Work closely with developers to discuss issues and validate fixes.
- Track and manage defect life cycle through resolution and verification stages.
- Re-test resolved defects to ensure proper implementation and stability.
- Continuously evaluate and improve testing strategies and processes.
- Conduct root cause analysis and suggest process optimizations.
- Contribute to improving team workflows and cross-functional collaboration.
